Fathead minnow	
Blacknose dace	

Physical Characteristics

Area - 32 acres

Maximum depth - 9 feet

Principal fishery: Brook trout

Temperatures:

Surface - 70°F

8 feet - 66°F

Jewett Pond is a shallow, weedy pond located northwest of Rowe Pond. The short inlet enters the eastern corner of the pond from Rowe Pond. Its outlet, Jewett Stream, flows west into Sandy Stream. The pond's shoreline is undeveloped.

Water quality in Jewett Pond is marginal for coldwater gamefish. Suitable spawning and nursery habitats are not present, but a limited brook trout fishery exists. Brook trout can migrate into nearby Rowe Pond as conditions deteriorate during the warm summer months and return to Jewett Pond as water temperatures cool. The pond is not stocked.

Jewett Pond is accessible via the Rowe Pond Road. The pond is open to fishing under general law in the summer and closed to fishing in the winter.

Surveyed - August, 1954

Resurveyed - 1993
